

# Potential contributions of the Regional Arctic System Model (RASAM) to ACME-Arctic

Andrew Roberts and Wieslaw Maslowski  
Naval Postgraduate School

# A brief chronology

Naval Postgraduate School  
Regional Ocean-Sea Ice

18km POCM-ice  
9km POP-ice  
Navy PIPS3  
9km POP-CICE

Fully Coupled

University of Colorado  
Atmosphere

63km ARCSyM  
atmosphere, land  
sea ice, slab ocean  
10-50km Polar MM5

2007-2010: Regional Arctic  
Climate Model (9/50km RACM)  
DOE CCPP (A. Bamzai)

2010-2014: Regional Arctic  
System Model (9/50km RASM)  
DOE RGCM (R. Joseph)

University of Washington  
Land-Hydrology

Variable Infiltration  
Capacity (polar)  
10-50km Arctic WRF

2015-2018: RASM II (2.4/25km)  
DOE RGCM (R. Joseph)

9/2.4km ice-ocean

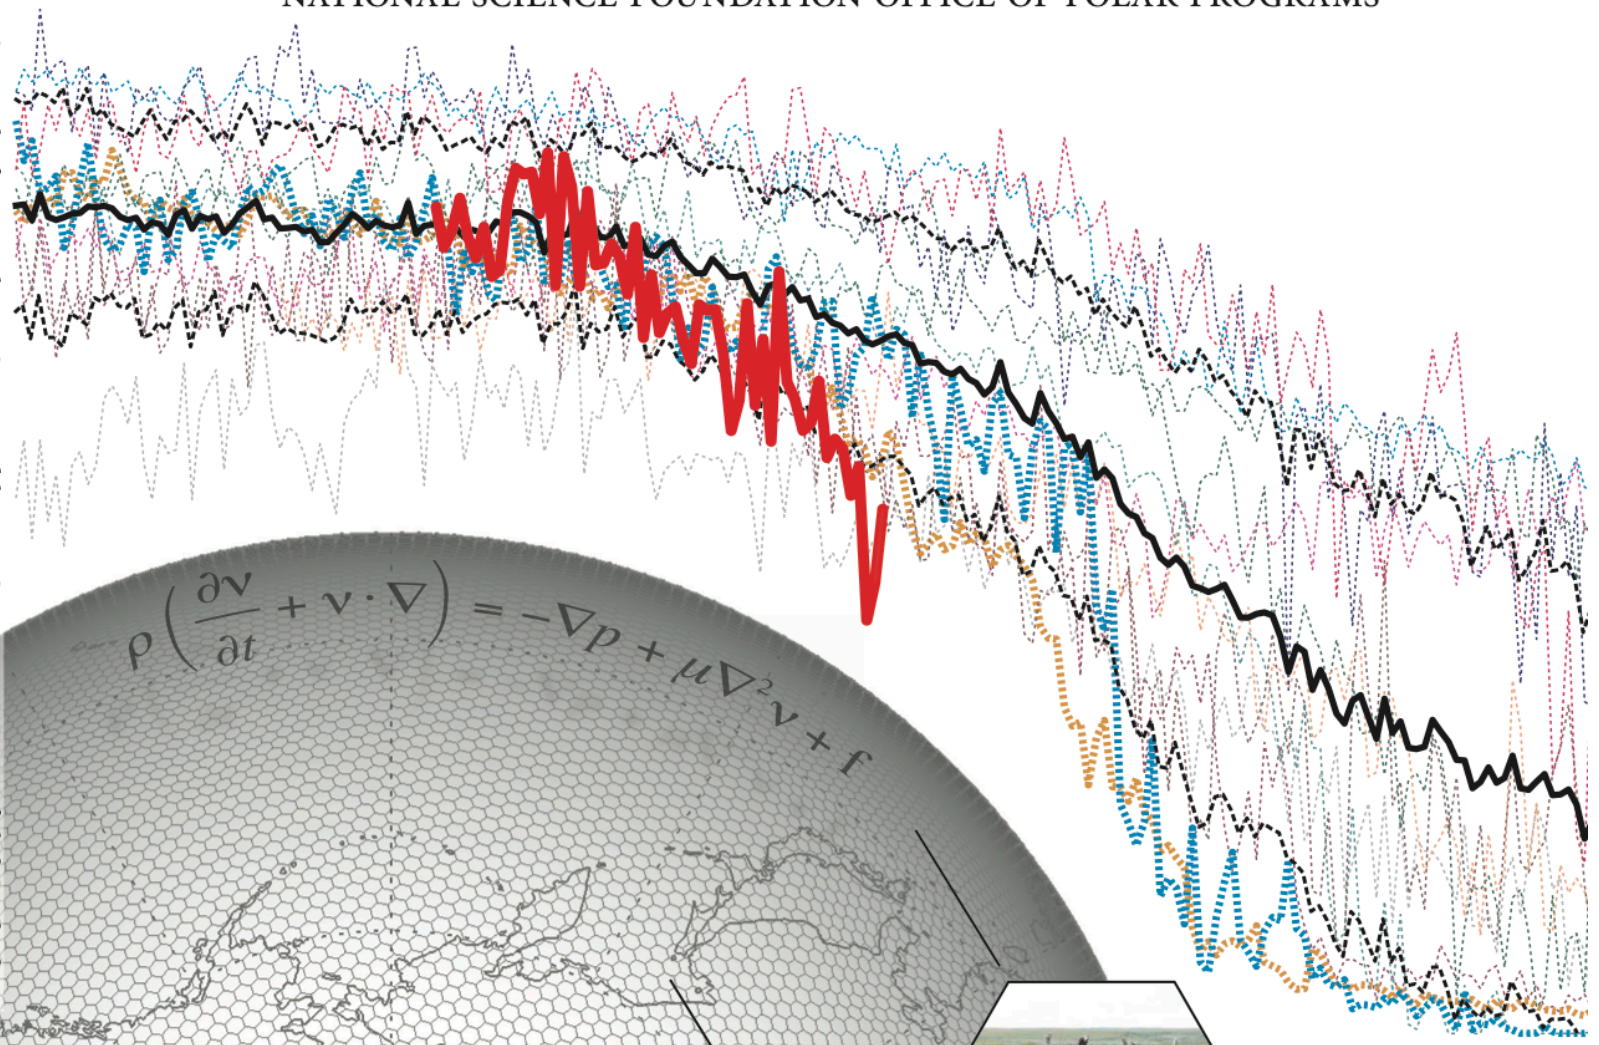

# A SCIENCE PLAN FOR REGIONAL ARCTIC SYSTEM MODELING

A REPORT BY THE ARCTIC RESEARCH COMMUNITY  
FOR THE  
NATIONAL SCIENCE FOUNDATION OFFICE OF POLAR PROGRAMS

Roberts, A. and coauthors 2010. A Science Plan for Regional Arctic System Modeling, IARC 10-0001, University of Alaska Fairbanks

$$\rho \left( \frac{\partial \mathbf{v}}{\partial t} + \mathbf{v} \cdot \nabla \right) = -\nabla p + \mu \nabla^2 \mathbf{v} + \mathbf{f}$$

University of Alaska  
Bigelow Laboratory  
LANL

How can an Arctic System Model be used to advance understanding and prediction of Arctic change?

1. By resolving unresolved or under represented **processes** in individual system components.
2. By addressing inadequacies along **coupling** channels between different system components
3. By exploring space-dependent **sensitivities** in the parameter space
4. Through a **hierarchical modeling** approach using regional and global models to help quantify uncertainty **for seasonal to decadal prediction.**

ACME-Arctic allows expanding this approach to global scales.

# 1990-2010 Mean sea ice thickness and extent

# RASM advances relevant to ACME-Arctic

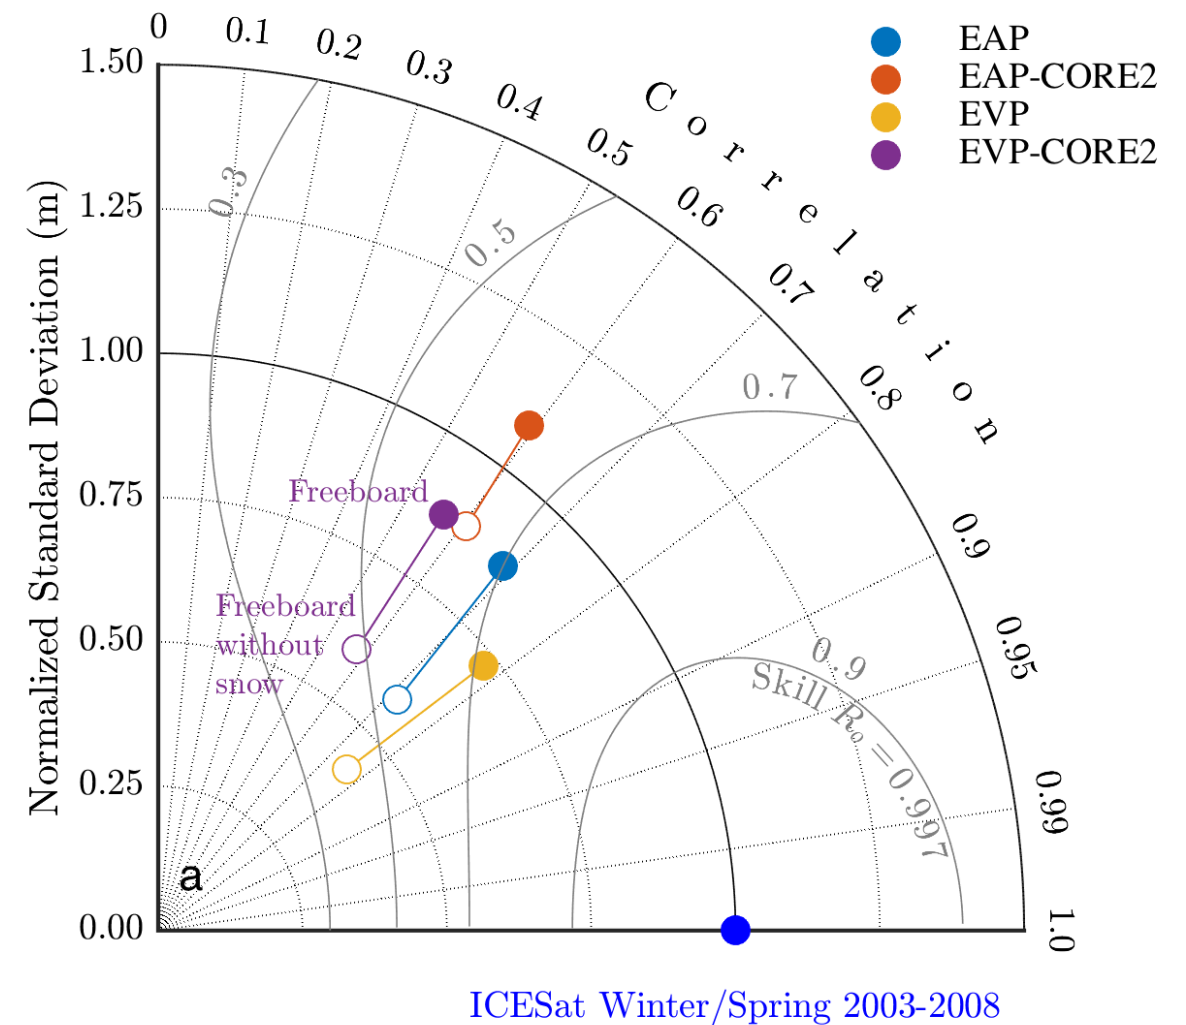

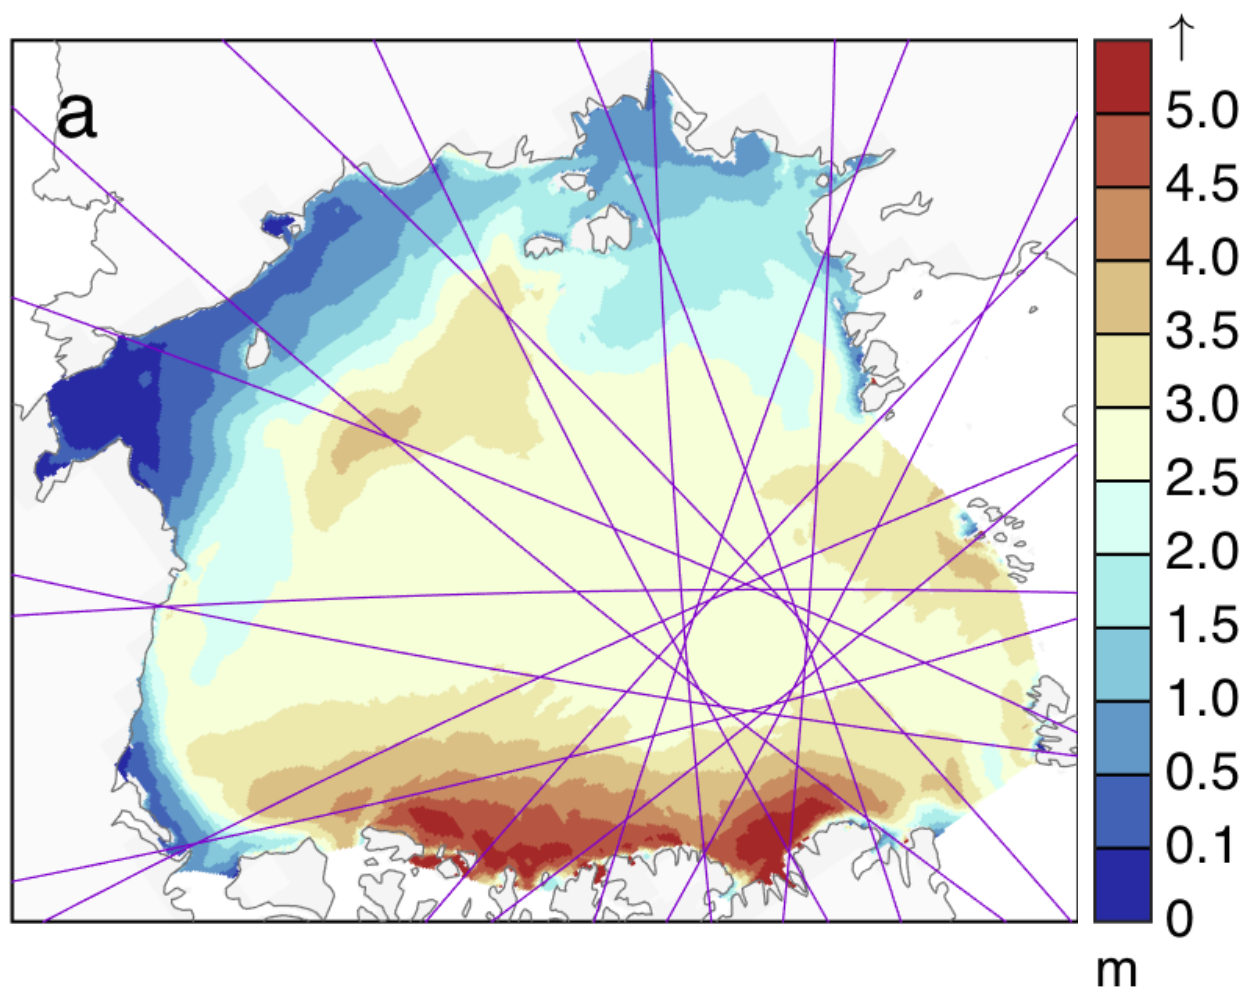

# RASM advances relevant to ACME-Arctic

RASM

Naval Postgraduate School  
University of Colorado  
University of Washington  
University of Alaska  
Bigelow Laboratory  
LANL

## 1. Improvements in coupled model analysis

Example: Satellite emulator in readiness for ICESat-2

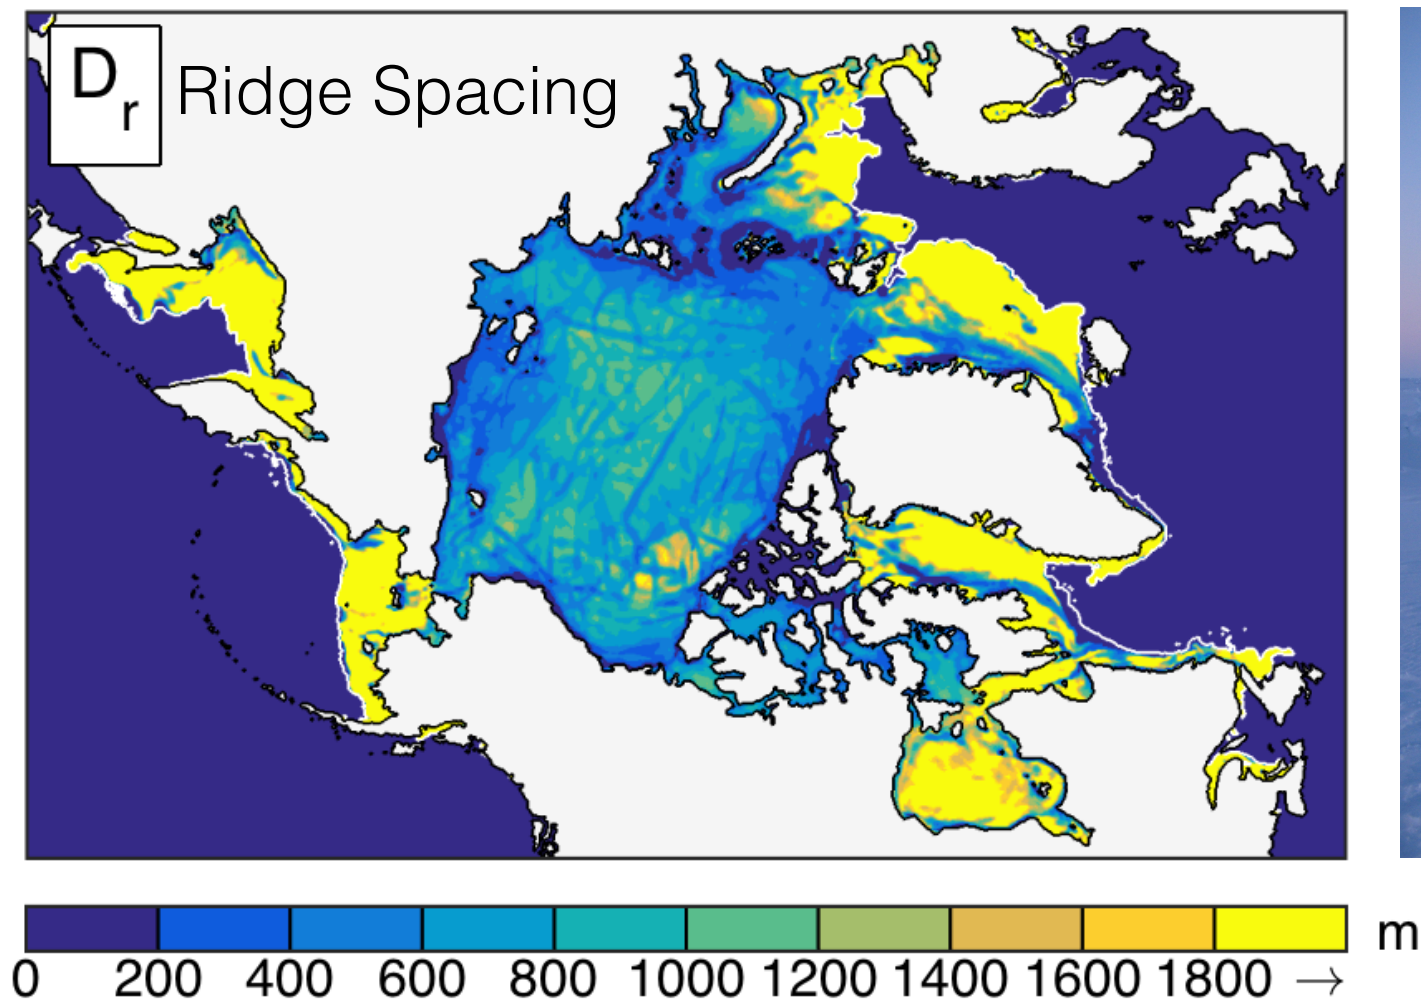

# RASM advances relevant to ACME-Arctic

RASM

Naval Postgraduate School  
University of Colorado  
University of Washington  
University of Alaska  
Bigelow Laboratory  
LANL

## 2. Scale-aware dynamics and analysis

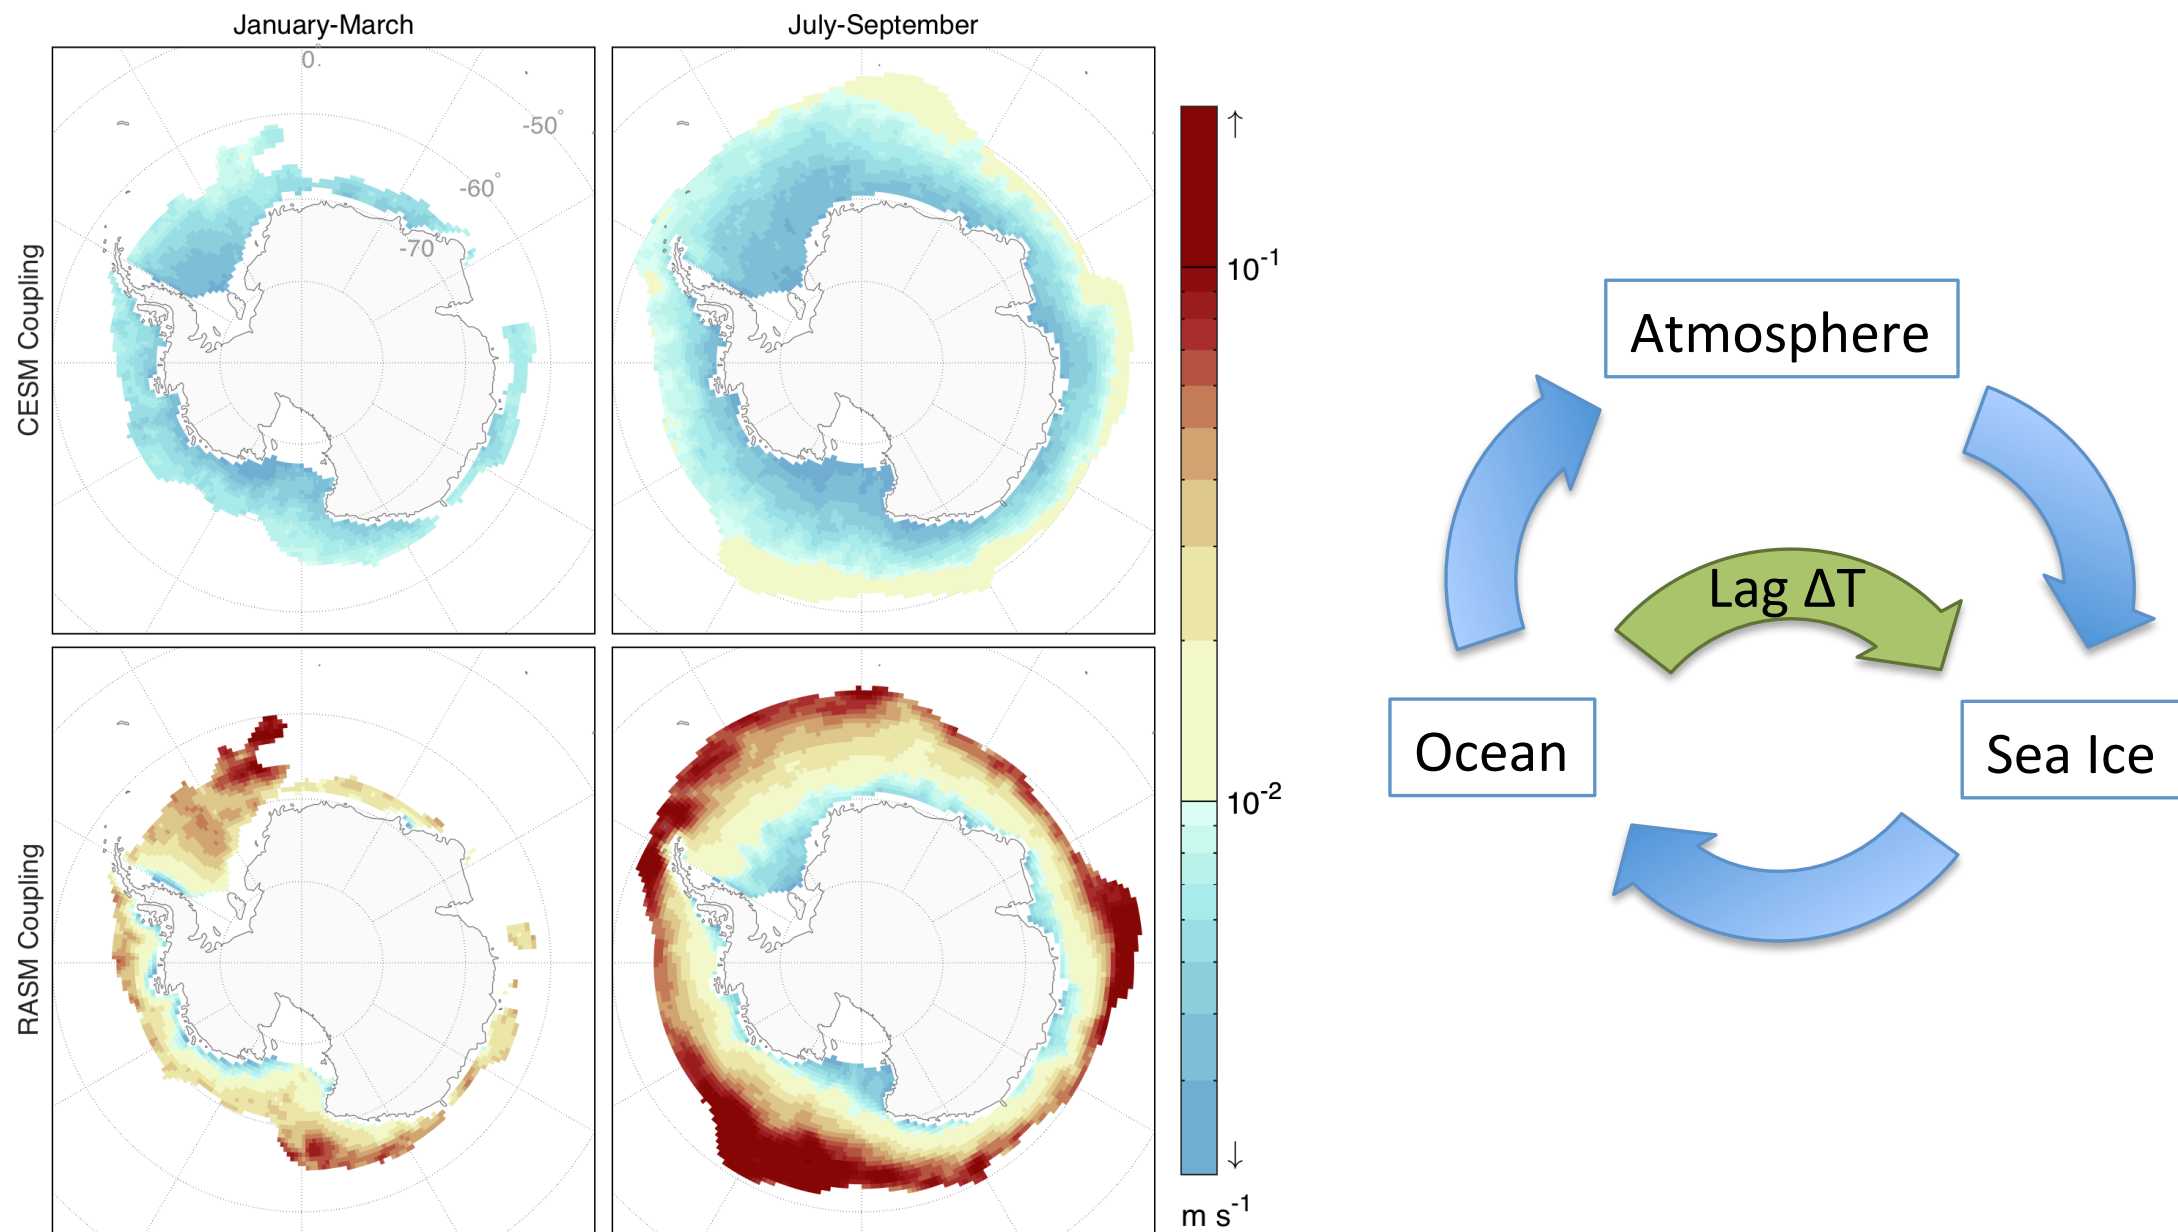

Example: Variational sea ice morphology

# RASM advances relevant to ACME-Arctic

RASM

Naval Postgraduate School  
University of Colorado  
University of Washington  
University of Alaska  
Bigelow Laboratory  
LANL

## 3. Advances in model coupling

Example: Reconfigured flux coupling

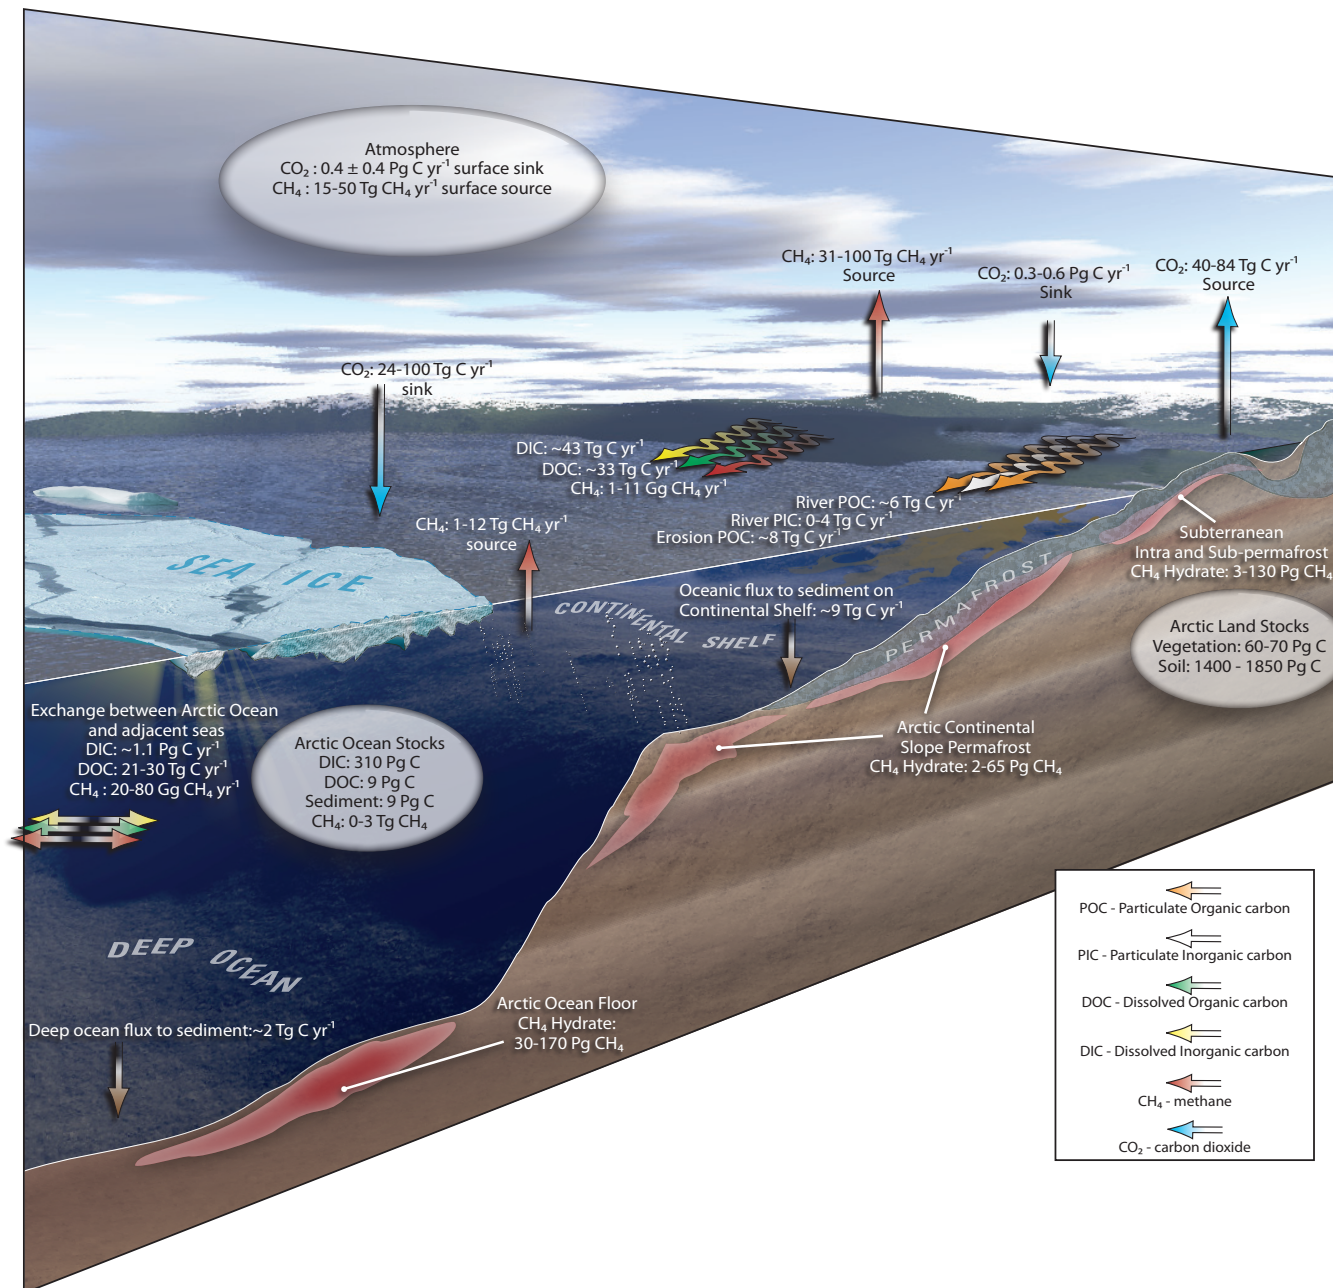

# RASM advances relevant to ACME-Arctic

RASM

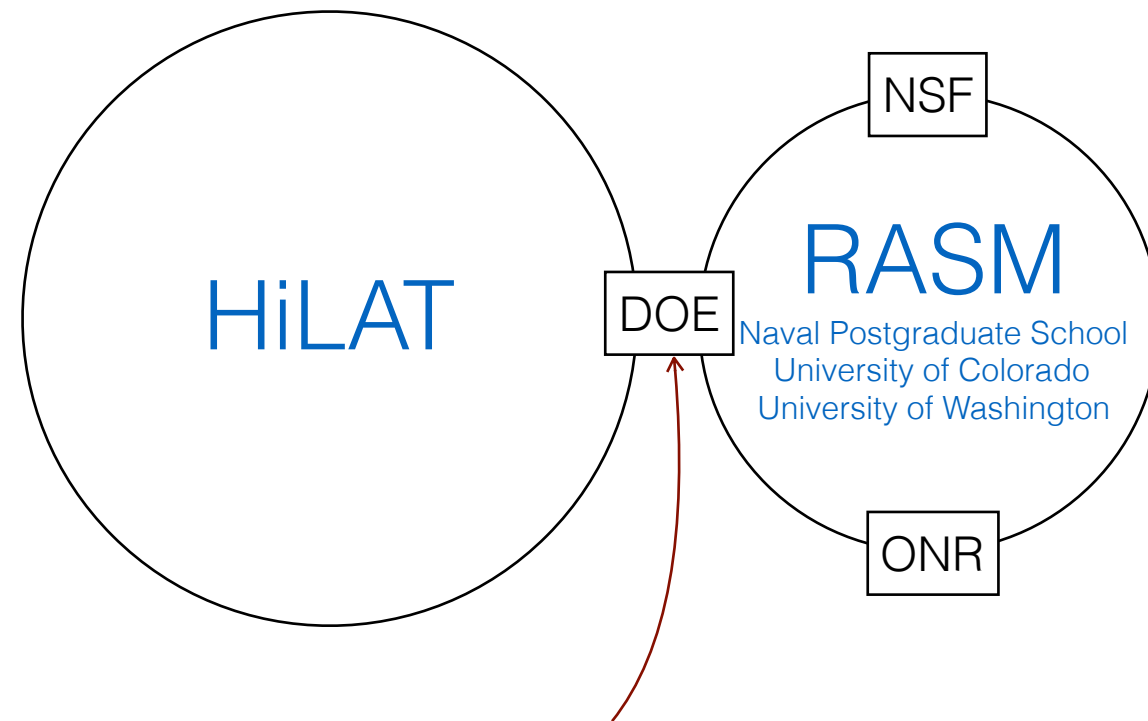

Naval Postgraduate School  
University of Colorado  
University of Washington  
University of Alaska  
Bigelow Laboratory  
LANL

## 4. Advances in modeling Arctic processes

Example: Marine biogeochemistry in RASM

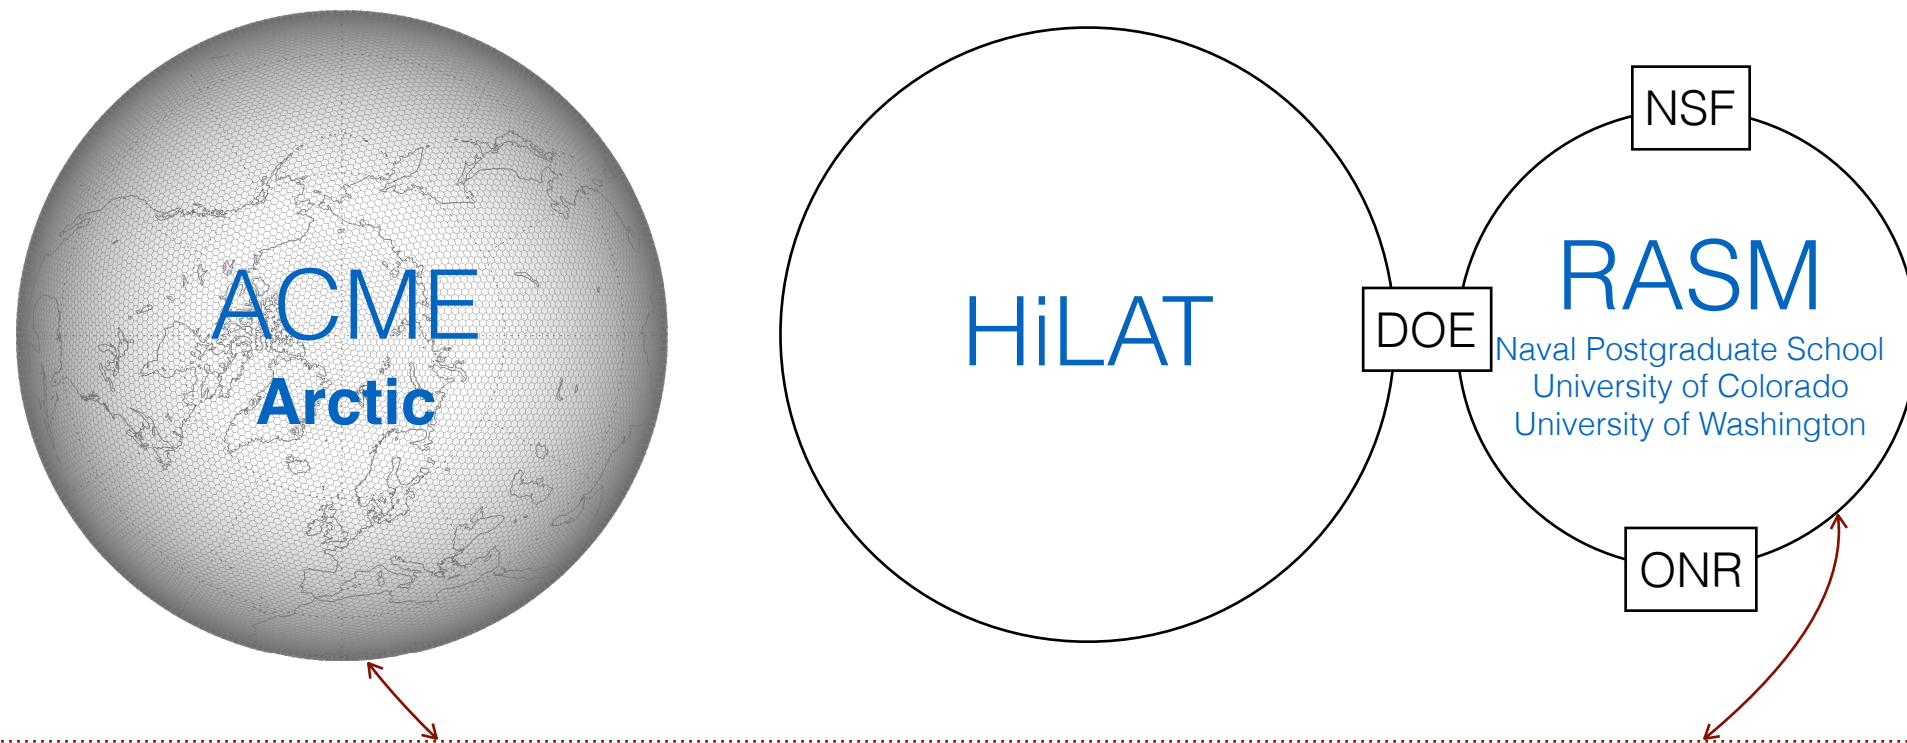

# RASM's current RGCM project and relationship with HiLAT

Model Analysis, Improvements, Metrics

# The RASM group is interested in contributing to advancements in ACME Arctic

## Proposed RASM contributions

- Satellite sea ice emulator for an adaptive grid
- Variational form drag for sea ice
- Scale-aware sea ice dynamics
- Evaluation and tuning of model components and their coupling
- Additional DOD HPC resources for multi-decadal simulations

# The RASM group is interested in contributing to advancements in ACME Arctic

Collaborative Agreement?

## Proposed RASM contributions

- Satellite sea ice emulator for an adaptive grid
- Variational form drag for sea ice
- Scale-aware sea ice dynamics
- Evaluation and tuning of model components and their coupling
- Additional DOD HPC resources for multi-decadal simulations
